## Why a Design Questionnaire?

We at Newveau are dedicated to providing personalized graphic solutions that reflect our clients' wishes. Therefore, we want to know what you hope to obtain from your website. You probably have an idea of what is the right direction for us to take with your design project.

The questions we ask are geared specifically toward developing the concept of the visual presentation of your site. Responses should only pertain to the website design and style and not to page or site content, unless it is referring to the way certain content is formatted or to be displayed. Statements such as "very informative" and "great articulation" will not be of assistance for these questions.

We know how valuable your time is, so we have tried to keep the questions as direct as possible. However, we still would like to encourage you to take your time as you work your way through the questionnaire. It is important to us to try to understand what you desire as closely as possible. We recommend that you take a look over this questionnaire and spend some time during your day to think about the questions. Then take 30 minutes to an hour to try to convey your thoughts as clearly as you can.
